

ZHD/ML Black Box Audience Seating Riser

Product Information Sheet

StageRight thinks
inside the black box

Versatility, flexibility, and reliability combine to make StageRight's Black Box Seating Risers the first choice of Theaters and Performing Art Centers around the world. Audiences will appreciate the StageRight Deck because it feels more solid under their feet and the composite structure of the deck reduces distracting noise. The modular system of decks with supports gives you the freedom to arrange different seating configurations, all with the same set of components.

Features and Benefits

Sturdy and Stable Platform

Decks bridge between understructures interlocking sections from left to right and front to back. The resulting seating risers are so solid that audiences feel like they are on permanent platforms.

Simple Set-up

Save set-up time by simply setting the one-piece multi-level folding support into position and unfolding it into place. Decks bridge between supports allowing fewer supports for set-up and tear-down. Greatly reduce leveling time as fewer elements contact the floor and the easy to use screw feet allow you to compensate for uneven floors.

Stores Compactly

Reduce your storage space because fewer supports are required. A support assembly shall fold compactly in 10-15% of its overall depth. For example, an 18' level riser shall fold from 54' setup to 5 1/2' in stored configuration.

Flexible Configuration

Configure seating to best suit each event. Build to unlimited width overall. Risers are not attached allowing flexibility in use and configuration. Utilize the same components to create multiple layouts. Side rails clamp on firmly and securely to any location further enhancing the systems flexibility.

LED Aisle Lighting

Ensure the safety for your patrons with optional LED stairway lighting available.

Technical Specifications

Function

Portable risers shall accommodate a wide variety of events. Units shall be capable of utilizing bridge decking front-to-back and side-to-side.

Supports

Support structure shall fold together for storage and be steel with baked on powder coat finish.

Decks

Decks shall be dual sided and shall be available in either TechStage or carpet surfaces.

Performance

System shall be capable of supporting 125#/sft. minimum.

Sample Configurations

Configure seating to best suit each event.

Ordering Information

Black Box Audience Seating Riser

Due to the custom nature of Black Box Audience Seating Risers, please contact a sales representative to discuss your facility. Our Special Projects Engineers will combine the latest design technology with state-of-the-art manufacturing processes to meet all your unique performance needs.
