INTRODUCTION

Safety, performance and dependability have been given top priority in the design and manufacture of these products making them easy to maintain and operate.

The care you give your equipment will greatly determine your satisfaction with its performance and service life. We urge a careful study of this manual to provide you with a thorough understanding of your new equipment before operating, as well as suggestions for operation and maintenance.

If your manual should become lost or destroyed, StageRight will gladly provide you with a new copy. Should you require additional information or assistance, please feel free to contact us.
WARNING!
READ AND UNDERSTAND ALL INSTRUCTIONS.
Failure to follow all instructions listed below may result in serious personal injury.

SAVE THESE INSTRUCTIONS

- Keep body and clothing free from and clear of all moving parts.
- Inspect equipment prior to use. DO NOT use if it appears damaged or inoperable.
- Obtain proper instruction on use of the equipment prior to using.
- Make sure there is enough room for safe access and operation of the equipment.
- Stay clear of all pinch points.
- Keep environment clear of all unused accessories as to avoid trip hazards.
- Save these instructions. Refer to them frequently and use them to instruct others who may use the weight equipment.
- Read the Product Information Packet. Failure to read the information packet is considered a misuse of this equipment.
StageRight Equipment Specifications

Sound Shell Tower Mover (Part # 322804)

- Hydraulic powered to provide easy lifting of towers.
- Swivel castors to allow movement in any direction.
- Easy to push design to allow easy movement of towers.
- All parts finished with black powder coat.

**Construction, Finish, and Hardware**

- Frame construction: 2"Ø X 14 GA. tube, A513 Gr, 1010 Steel
- 1/2" Steel bar lift plates.
- Baked-on Powder coat finish.
- 10,000 PSI dual stage hydraulic hand pump
- Castor assemblies have one 5 ton capacity hydraulic cylinder with 1" lift capacity.
- Five dual wheel swivel castors with 400 pound lift capacity per castor assembly.
Remove lower panel of the tower, and roll tower mover into place. Make sure the floor is clear of debris and there are no obstructions hanging from the ceiling.

Tighten this knob to avoid loss of pressure.
Move tower wings into the mid-span position, and roll the mover into place. Lift plates must be fully engaged on lift puck before lifting. (Plan & detail view shown)

Make sure the vent knob on the hydraulic jack is closed. Use the jack to lift the tower far enough to allow easy movement. Do not move the tower alone; help is required to avoid objects on the floor and hanging objects.
When tower is in place, loosen this knob slowly to drop tower down to the floor. Move wings back to open position and replace lower panel.
WARNING!
READ AND UNDERSTAND ALL MAINTENANCE PROCEDURES.
Failure to follow all procedures listed below may cause serious injury and a decrease in the equipment's functional existence.

- Frequently check to see that all hoses are securely fastened.

- Frequently check to see that the hydraulic jack is functioning properly.

- Touchup paint can be used to cover any scratches or blemishes sustained through use.

- Replace any damaged equipment with genuine StageRight parts. Failure to do so may result in unsafe equipment and/or personal injury.
Customer Service

For parts or service contact StageRight Corporation. When ordering parts be sure to provide all relevant information available including the name and part number of the equipment purchased. This information is located on the cover of this product information package. Individual part numbers can be found on the parts list page of this product information package. Hours of phone service are Monday through Friday from 8:00 a.m. to 5:00 p.m. Eastern Standard Time. Customers can phone toll free at (800) 438-4499 or mail:
