

CC-500 Crowd Control Barricade

Product Information Sheet

Facilitate safety and security, profit from compact storage and easy handling.

Get rock-solid security and spectator safety. You'll get superior crowd control with the utmost in safety and visibility. Multiple safety features are integrated into the design to protect both security and patrons. Each piece is designed for easy handling and storage. No lifting, twisting, or tools are required.

CC-500 Crowd Control Barricade

Features and Benefits

Utmost in Safety for Patrons and Security

- Tapered floors reduce tripping and rounded tops minimize injury.
- Built in step for better security management
- Solid construction

Ease of Use and Storage

- Simply set in location and lift to locked position
- Combine multiple units fast and easy
- Stores flat for compact storage

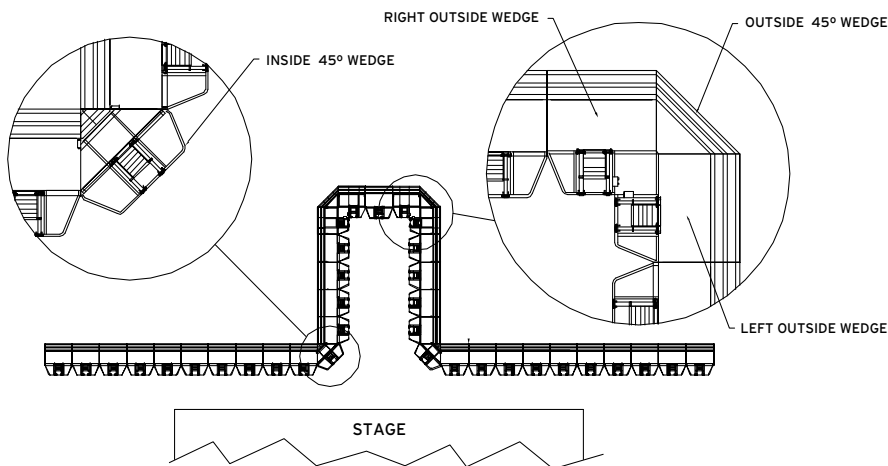

Mesh Walls

- Provide greater visibility for security and fans
- Allow lights, smoke, and sound to pass through.

Accessories

- Transport Cart stores barricades in compactly with easy to move casters. Hold 8 units.
- Add-on Step extension bridges the back of two units giving security a larger platform
- Optional Corner pieces allow for thrust layouts to create inside and outside angles

Thrust Layout

Technical Specifications

Function

Crowd control barricade shall provide facility security and spectator safety. Barricade shall move easily into place and set up without tools. The base floor shall be tapered (minimizing trip hazard); the top of the wall shall be rounded (minimizing injury hazard); and the wall shall be mesh (allowing some visibility to the floor). Built-in step shall allow personnel reach and leverage. Units shall lock together without tools.

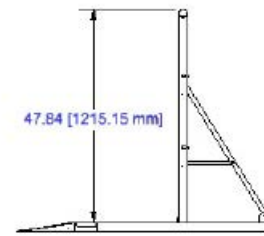

Storage

Barricade shall store compactly, just 4.2" high by 56" x 48." It shall fold by releasing the locking step and fold down in one motion. Optional transporter shall hold 8 units stacked.

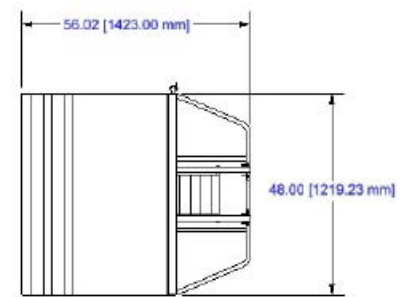

Construction

Base and wall frames shall be steel tubing. Base floor shall be steel sheet. Unit-to-unit lock shall be steel bar. Steel parts shall be finished with non-glare baked on polyester powder coating material.
