

Z-800 Support System

Product Information Sheet

Change your stage configuration for each event with the versatile Z-support system.

When it comes to versatility, the Z-support system is hard to match. The StageRight Z-support system can be configured as seating risers, speaker platforms, choral risers, theater stages, show-choir risers, head table risers, fashion show runways, and band risers - all using the same decks and Z-supports. You'll minimize your initial investment because you can use the same support system for a wide variety of staging needs. Assembly is as easy as unfolding the one-piece support to form a "Z" shape, and placing the deck on it. No tools are required. Diagonal bracing, provide stability so the platform won't creak or sway.

Z-800 Support System

Features and Benefits

Multiple Configurations

- Arrange different layouts to suit various events.
- Minimize your initial investment and storage space requirements because there is no need to buy and store separate staging systems for several types of events.

One-Piece Support

- Save time and labor with fast, simple setup and storage.
- Minimize storage space requirements.
- Waste no time looking for tools or assembling loose parts.

Horizontal and Diagonal Bracing

- Enhance performances with stable platform (no swaying or creaking).
- Feel like you are on a permanent platform.

Adjustable-Height Models

- Save time and reduce your initial investment by using the same supports at different heights for various applications (height adjusts in 2" increments).
- Create risers or flat staging with the same equipment.

Safety-Fold Support

- Avoid accidents: With the deck in place, the Z-leg cannot accidentally fold or collapse during use.

Tapered Locator Nodes

- Save setup time because decks align and secure quickly and without tools.

Screw-Foot Leveling

- Compensate for uneven floors with one inch of easy, fine-adjustment leveling.
- Protect floor surfaces with nylon pad on the base of each Screw Foot.

Technical Specifications

Function

Portable risers or staging shall accommodate a wide variety of events.

Supports

Z-support shall be a one-piece construction and unfold in "Z" shape to accept StageRight Decks. Support shall, without tools, fold compactly for storage.

Bracing

Support shall be braced horizontally to reduce swaying and creaking. Additional lateral stability shall be provided by diagonal bracing.

Locator Nodes

Conical nodes shall guide the decks into location and proper alignment, securing them in place without tools or clamps.

Leveling

A screw foot at the base of each leg shall provide a one-inch range of fine-adjustment leveling. The base of each screw foot shall be a 1 1/2"-diameter nylon pad.

Construction

Braces shall be 1" square or 1" x 2" rectangular steel. Outer legs shall be 1 1/2" O.D. steel tube; inner legs shall be 1 1/4" O.D. steel tube. Each support shall have two 17" straps to connect it to adjoining units. Each strap shall be made of 2" nylon webbing with hook-and-loop Velcro™ (except the 8" tall Z-800 Support shall have 1" wide webbing). All steel components shall be finished with a black baked-on powder-coated finish. On variable-height models, spacer buttons on the telescopic legs shall eliminate metal-to-metal contact.

Options

Accommodate Deck sizes:
 4' x 8', 4' x 6', 4' x 4', 3' x 8', 3' x 6'
 Fixed Heights: 8", 12", 16", 24", 32"
 Variable Heights: 12"-16", 16"-24", 24"-32"
 E-Z Clips for unit-to-unit connection

Performance

Certified uniformly distributed live-load capacity of 4000 pounds per 4' x 8' section 125 pounds per square foot.

End View

Available in fixed and adjustable heights from 8" to 32"
