

Flag Cart

Product Information Sheet

The new wave in flag carts

StageRight is setting new standards for Flag Carts. Large foam-filled casters move well on all surfaces and lock to provide stability during flag removal. The cart handle is designed for both motorized towing and people-powered maneuvering. The handle can also be locked upright to prevent tripping. Its 80 flag capacity allows 20 members to store 4 flags each in protective plastic lined flag holes, while allowing room for labels. Multiple carts can be easily connected together for a rapid, more efficient deployment. Fly this Flag Cart with pride.

Flag Cart

Features and Benefits

Seamless Movement

- Large foam-filled casters allow movement on all surfaces
- Handle allows the cart to be either pulled or towed
- Locks keep the cart stable during removal of flags
- In storage position, easily transport through standard doorways

Attractive

- Powder coat paint gives a polished look and a long-lasting finish
- Special order colors available to match school colors

Safe to Use

- Pull bar locks to prevent performers from tripping
- Casters lock to keep cart stable
- Rounded tubular steel protects those loading and unloading
- Plastic barriers protect poles when storing and removing

Simple to Store

- Pull bar locks for compact storage
- Locking casters ensure stability during storage
- Easily move to and from storage as the cart easily fits through standard doorways.

Easy to Transport

- Join carts to create a train for faster deployment
- Rounded tubular steel prevents catching on corners

Special Features

- 80 Flag Capacity
- Sectioned off storage complete with room for labeling

Technical Specifications

Function

Flag cart shall provide transportation for your Color Guard flags for both practice and performance. Cart acts as a storage unit while flags are not in use.

Set-up

Set-up for transportation is as easy as releasing the handle from storage position. For storing simply lift the handle into storage position.

Safety

Handle locks into upright position to prevent tripping, while locking casters provide stability during removal and placement of flags. Rounded tubular steel protects members from sharp edges during loading and unloading. Protective barriers keep poles from scratching and damaging when storing and removing.

Low Maintenance

Powder-coat finish helps protect your cart, while presenting a clean and polished look. Easily fits through standard doorways making transportation to and from the field effortless.

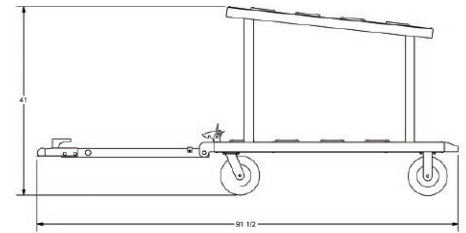

Construction

Cart shall be made of ASTM A500, ASTM A512 tubular steel and ASTM A36 Steel plates. Protective barriers keep poles from damaging when storing and removing. Foam-filled casters never require maintenance or air refill. Cart shall be finished with black baked-on powder-coated finish. Zinc plated front hitch resists corrosion, while the rear hitch allows additional carts to be joined for faster deployment.

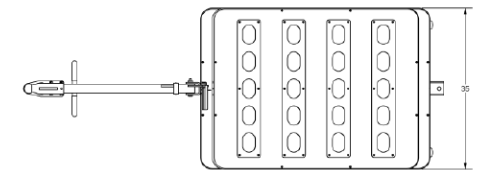

Options

Special order powder-coat finish is available to match your school colors.
